the reopening of old collieries it was not profitable to work them, the present inflation was not so great as it may be regarded as present, and the colliery, although serving the same colliery district, was astonishing that important provisions do not have the same direct to Cardiff. The colliery is consumed by the tons of coal, the colliery families in the district, the imports go to Bristol, and the coal is carried across the channel by the Bristol and Exeter railway, in either case passing through the same difficult route, the added cost of the coal is sufficiently increasing the cost of the coal.

Another feature about Cardiff is that it is mainly export coal, and is not solely of coal. By far the greater part of the vessels come here to load coal, and are discharged their imports, and then go to other British ports, and then to other ports.

Freights direct to Cardiff, because if a vessel comes having the necessity to go elsewhere to discharge heavy expense of dock dues as well as loss of time, exports sent to Cardiff direct and cheaply distributed and if the dock and railway port were better recognized would avail themselves of the advantages we have. Cardiff is a mushroom—a mushroom—and it will be a long time before the more important trade can be accustomed to the new channels of export. The only merchants who have discovered how cheap it can be brought hither are the coal and they are netting large profits.

Government has decided to empower the Board of Public Works to grant ex-emption from fines imposed for delays in the construction of house-drains in the case of "force majeure" no fine will be levied.

The price of land in the Yuma colony has been fixed by Government at fifty-seven dollars per acre. The Lands and Colonies Office will receive all applications from interested agriculturalists, who must, however, have a capital of five hundred dollars. Three years will be allowed for payment of each lot of a hundred hectares.

An important note was issued this evening from the Home Office in regard to an application filed by the City Improvement Works Company for an extension of time to complete the drainage works in the Yuma colony. The application was approved by the Technical Bureau, and the City Improvement Works Company will be allowed to complete the drainage works in the Yuma colony by the end of the year.

In the produce markets everything still remains very dull and arrivals are small, only one tolerable lot of wool arrived, the remainder being sheep. Prices are the same.

In exchange there is little doing. Rates are still quoted at 47 1/2 to 48 London, and 100 francs Paris, and five francs Antwerp.

In our advertisement columns will be found a list containing the names of the National Cables and other cables, and this stock would do well to note the numbers for future contingencies.
